## Vascular Solutions Launches Convenient D-Stat® Dry Wrap Hemostatic Bandage

MINNEAPOLIS, Minnesota -- Vascular Solutions, Inc. recently announced the launch of its D-Stat Dry Wrap hemostatic bandage. A convenient pre-cut version of the market leading D-Stat Dry hemostat, D-Stat Dry Wrap is designed specifically for the control of bleeding around indwelling lines.

D-Stat Dry Wrap is the latest addition to Vascular Solutions' complete line of D-Stat hemostasis products, which use the power of thrombin to control bleeding. A powerful component of the clotting cascade, thrombin cleaves fibrinogen to fibrin, enhancing the body's own mechanism to produce a clot. D-Stat Dry Wrap contains the same thrombin activity level as the original D-Stat Dry, and comes complete with a clear adhesive bandage for continuous site monitoring after hemostasis is achieved. D-Stat Dry Wrap is currently available in the United States.

Vascular Solutions, Inc. is a leading medical device company that delivers proprietary clinical solutions for diagnosing and treating vascular conditions. The company's rapidly growing product line consists of innovative devices across established and emerging areas of coronary and peripheral vascular medicine.
