

Topical Hemostat

D-Stat[®] 2 Dry
Hemostatic Bandage

***A convenient 2-bandage version
of the D-Stat Dry***

**A powerful and simple
“open and apply” solution**

- Pad can be separated in two for application on two separate puncture sites
- Contains the power of thrombin to facilitate hemostasis
- Two custom adhesive bandages included

D-Stat² Dry

Hemostatic Bandage *Topical Hemostat*

Model	Description	Box Quantity
3010	D-Stat 2 Dry Hemostatic Bandage	10*

* Devices packaged in quantities of 10 units per box. Individual units are not sold separately.

The D-Stat 2 Dry Hemostatic Bandage is intended for use under the direction of a healthcare professional for the local management and control of bleeding from vascular access sites and percutaneous catheters and tubes.

*D-Stat 2 Dry hemostatic bandage is part of Vascular Solutions' D-Stat line of hemostatic products, including D-Stat Flowable hemostat, D-Stat Dry hemostatic bandage, D-Stat Rad-Band topical hemostat, D-Stat Dry Wrap hemostatic bandage and D-Stat Clamp Accessory.***

The use of topical bovine thrombin preparations has occasionally been associated with abnormalities in hemostasis ranging from asymptomatic alterations in laboratory determinations, such as prothrombin time (PT) and partial thromboplastin time (PTT), to severe bleeding or thrombosis which rarely have been fatal. These hemostatic effects appear to be related to the formation of antibodies against bovine thrombin and/or factor V which in some cases may cross react with human factor V, potentially resulting in factor V deficiency. Repeated clinical applications of topical bovine thrombin increase the likelihood that antibodies against thrombin and/or factor V may be formed. Consultation with an expert in coagulation disorders is recommended if a patient exhibits abnormal coagulation laboratory values, abnormal bleeding, or abnormal thrombosis following the use of topical thrombin. Any interventions should consider the immunologic basis of this condition. Patients with antibodies to bovine thrombin preparations should not be re-exposed to these products.

The D-Stat 2 Dry is contraindicated in persons with known sensitivity to bovine-derived materials. Please see the Instructions for Use for a complete listing of the indications, contraindications, warnings and precautions.

CAUTION: Federal law (U.S.A.) restricts this device to sale by or on the order of a physician.

** These D-Stat products are available in the United States. Not all products are available in all countries. Please contact the Vascular Solutions distributor or direct sales office for product availability.

U.S. and International patents pending.
