

D-Stat[®] Dry Clear

Hemostatic Bandage

Topical Hemostat

With D-Stat Dry Clear,
the advantage is
...obvious!

D-Stat Dry, offered in a clear bandage version

- Clear visualization of the wound site
- Reinforced borders for more precise placement than other clear bandages
- Easy application and removal

D-Stat® Dry Clear

Hemostatic Bandage Topical Hemostat

Model	Description	Box Quantity
3005	D-Stat Dry Clear	10*

* Devices packaged in quantities of 10 units per box. Individual units are not sold separately.

The D-Stat Dry is applied topically as an adjunct to manual compression and is indicated for the control of surface bleeding from vascular access sites and percutaneous catheters or tubes and for reducing the time-to-hemostasis in patients undergoing diagnostic endovascular procedures utilizing 4-6 Fr. introducer sheaths.

*D-Stat Dry Clear hemostatic bandage is part of Vascular Solutions' D-Stat line of hemostatic products, including D-Stat Flowable hemostat, D-Stat Rad-Band topical hemostat, D-Stat 2 Dry hemostatic bandage and D-Stat Clamp Accessory.***

The use of topical bovine thrombin preparations has occasionally been associated with abnormalities in hemostasis ranging from asymptomatic alterations in laboratory determinations, such as prothrombin time (PT) and partial thromboplastin time (PTT), to severe bleeding or thrombosis which rarely have been fatal. These hemostatic effects appear to be related to the formation of antibodies against bovine thrombin and/or factor V which in some cases may cross react with human factor V, potentially resulting in factor V deficiency. Repeated clinical applications of topical bovine thrombin increase the likelihood that antibodies against thrombin and/or factor V may be formed. Consultation with an expert in coagulation disorders is recommended if a patient exhibits abnormal coagulation laboratory values, abnormal bleeding, or abnormal thrombosis following the use of topical thrombin. Any interventions should consider the immunologic basis of this condition. Patients with antibodies to bovine thrombin preparations should not be re-exposed to these products.

The D-Stat Dry is contraindicated in persons with known sensitivity to bovine-derived materials. Please see the Instructions for Use for a complete listing of the indications, contraindications, warnings and precautions.

CAUTION: Federal law (U.S.A.) restricts this device to sale by or on the order of a physician.

** These D-Stat products are available in the United States. Not all products are available in all countries. Please contact the Vascular Solutions distributor or direct sales office for product availability.

U.S. and International patents pending.
