## Vascular Solutions Expands Transradial Product Line with the D-Stat® Rad-Band

MINNEAPOLIS, Minnesota -- Vascular Solutions, Inc. announces the availability of the new D-Stat® Rad-Band. This hemostatic band delivers the power of thrombin, contained in all D-Stat products, to facilitate hemostasis at the radial artery puncture site. With easy, single operator application, D-Stat Rad-Band utilizes non-occlusive pressure to keep the ulnar artery patent during compression of the radial artery.

A new and improved version of the original D-Stat Radial hemostatic band, the D-Stat Rad-Band provides greater stability and easier application. Additionally, the new design incorporates the advantages of a quick release feature and a larger release tab making it easier to detach the translucent comfort pad without disrupting clot integrity. Each D-Stat Rad-Band is supplied with a clear adhesive bandage for easy visualization of the puncture site.

D-Stat Rad-Band is currently available for sale in the United States through Vascular Solutions' direct sales force.

Vascular Solutions, Inc. is a leading medical device company that delivers proprietary clinical solutions for diagnosing and treating vascular conditions. The company's rapidly growing product line consists of innovative devices across established and emerging areas of coronary and peripheral vascular medicine.
